

REMARKS

This amendment corrects inconsistencies between the drawings and the Brief Description of the Drawings in the specification. Applicants assert that the brief description of drawing FIG. 19 clearly complies with the provisions of 35 U.S.C. § 132 as no new matter has been introduced into the disclosure of the invention because the brief description of drawing FIG. 19 is clearly set forth in the specification in paragraph [0069] when taken in conjunction with drawing FIG.19.

Respectfully submitted,

James R. Duzan
